

EX[®] Series

Universal Compression Connector

Series 11

Overview

PPC's EX[®] connectors boast the largest dynamic range of any connector on the market, making it compatible with standard through quad shield cables. EX also doesn't rely on an o-ring to seal the back end of the connector environmentally - it uses the dynamic range of the tough, yet versatile plastic body to seal in the most effective way possible. The metal compression ring also allows for industry-leading cable retention values through all cable sizes in the field.

Optional AquaTight[®] technology takes the guesswork out of sealing connections. The durable and reusable clear seal morphs to fit all port lengths, and confirms that a seal is properly installed on every connection.

Technical Data

Parameter	Data
